

Installation

To install this plugin, copy the `basicenumerator` directory into the `studio/plugins/` directory of your appleseed installation.

It should look like this:

```
<root appleseed directory>
  bin/
  ...
  studio/
    plugins/
      basicenumerator/
        __init__.py
```

Usage

To use this plugin, run the following commands in appleseed.studio's Python console:

```
import basicenumerator
basicenumerator.list_objects()
```
